

W SMART BATTERY OPERATED

Uni-Blinds®

Innovation comes built-in

INNOVATION COMES BUILT IN

Wire-free, rechargeable battery operated simplicity is at the heart of the motorised W Smart system with ScreenLine® inside. This system enables a Venetian or pleated blind encapsulated within a double or triple glazed unit to be raised, lowered and slat tilted via a single control device attached to the window, with an optional remote control also available.

Suitable for both residential and commercial environments, W Smart is sleek, maintenance-free and available for Uni-Blinds® integral blinds within 20, 22, 27 or 29mm cavities. And because it operates using rechargeable battery power, it does not need to be hard-wired during installation.

Why choose the W Smart?

W Smart perfectly meets the needs of our modern lifestyles, offering a tech-based shading and privacy solution to enhance any home or commercial property. It combines the latest innovations in Italian design with the long term reliability and superb build quality that defines every ScreenLine® system. The motorised blinds feature a smooth and quiet 3.6V motor, powered by a rechargeable lithium-ion battery, for use any time of the day or night. They are easy to operate too thanks to an intuitive touch control unit complete with LED-illuminated arrows and low-battery indicator.

BENEFITS OF THE W SMART

A motorised integral blind which oozes appeal:

- Streamlined installation procedure
- No need for electrician to install
- For 20, 22, 27 and 29mm cavity, in Venetian or pleated Uni-Blinds®
- Stylish, compact battery module, developed in co-operation with renowned design specialists
- LED-illuminated touch control keys
- Optional radio remote control available for additional convenience
- Batteries recharged approximately every 1-3 months using a micro-USB connector
- Optional mini solar panel available for windows and doors positioned in strong sunlight to enable recharging from the sun
- Super-hygienic thanks to the patented Sanitized® antimicrobial technology applied to the battery module, offering a long-lasting protective function

HOW THE W SMART OPERATES

^ RAISING

▼ LOWERING

↙ ↘ TILTING

Tap on the LED arrow to tilt or hold LED arrow to fully raise or lower

In W (Wireless) systems, blinds are raised and lowered by a control device which allows light and heat gains to be adjusted with ease. A user-friendly, versatile system, its power comes from a high quality rechargeable battery which is topped up every 1-3 months typically, depending on use. It can also be paired with an externally mounted solar panel where levels of sunlight permit to boost battery life, and a radio remote control device for greater convenience.

*Please consider on south-facing elevations the high solar heat gain during the summer months may result in the glass being too warm to touch. In this case, we recommend a high solar control glass type such as SKN 176 which will reduce but not eradicate the heat. Please bear this in mind when choosing the colour of your Uni-Blinds® especially S158, S159 and B160.

**Colour specifications may be subject to change

BATTERY MODULE COLOUR

HEADRAIL COLOUR

*Headrail colour to match blind slat, excluding S120, S158, and dual colour.
